Re: Obsolescence of remaining TH and TL models

Dear Valued Customer / Partner,

Due to the costs to certify to the new IEC 62368-1 safety standard, the remaining models in the TH and TL series are to be discontinued, effective December 31st, 2020. Many of the part numbers TDK-Lambda has not sold for several years. The part numbers are:

TH120012
TH120024V26
TH120024V27
TH120024V28
TH120048
TH250048
THR4
THR400
THR400048
TL150024

The manufacturing facility has indicated that additional units may be available, but could be subject to minimum order quantities. These may not have safety certifications to EN 60950-1. There is also some TDK-Lambda and distribution stock in place. The last time ship date would be May 31st 2021.

Please understand that additional orders would be non-cancelable and non-returnable and cannot be counted towards future stock rotations.

Contact our office or technical support for additional information. 1-800-526-2324 or email powersolutions@us.tdk-lambda.com.
