Power+ Solutions

The Heart of your Application

At TDK-Lambda, a “Power Supply” is more than just an electronic device. It is the “heart” of our customers’ systems and the core element of safety and reliability.

Since 1948 as a leading global manufacturer we have been developing and producing innovative and highly reliable power supplies for a wide spectrum of applications. In addition, with our unique range of activities from research and development

through to manufacturing, sales and service, our customers appreciate our experience, know-how and our passion for always wishing to find the best solution for our customers.

Power+ Solutions

What if a standard power supply doesn't meet your specifications? Do you need an additional cable, a special enclosure or another custom adjustment? The answer is Power+ Solutions. We transform a standard product into a unique solution that you can immediately integrate into your applications, without worrying about issues like approvals, EMC, or supplier selection.

Benefits of our Power+ Solutions

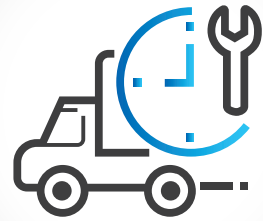

- Low development costs and quick time-to-market
- Realisable even for small and medium-sized production runs
- High reliability due to high-quality and long-lasting products
- Supplier reduction – you work with a single order number
- Manufacturing depth as far as you, the customer, define it
- Reduced logistics, material procurement and warehousing
- Optimal technical and commercial overall solution
- At the forefront of developing and applying cutting-edge technology
- One contact person from enquiry to EOL

Your Way to your individual Power

Follow us on the path to greater cost-efficiency, quicker time-to-market, customised solutions and professional support for small and large production volumes.

We consider your entire production process – including logistics, warehousing and also **cost-effectiveness**.

Get in touch with TDK-Lambda and tell us about your **specific needs**.

What to do when a **standard power supply** does not meet your requirements?

Arrange an **on-site** visit with your experts.

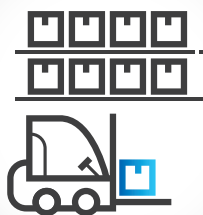

Solutions

Collaborate with our team to establish the exact **specifications** for your application.

We develop your customised **solution**.

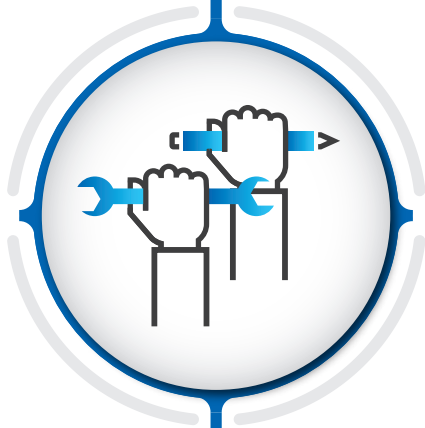

We select the optimal power supply from our extensive range of over **4000 models** as the foundation for your application.

Power

Final ATE (Automatic Test Equipment) testing and data storage.

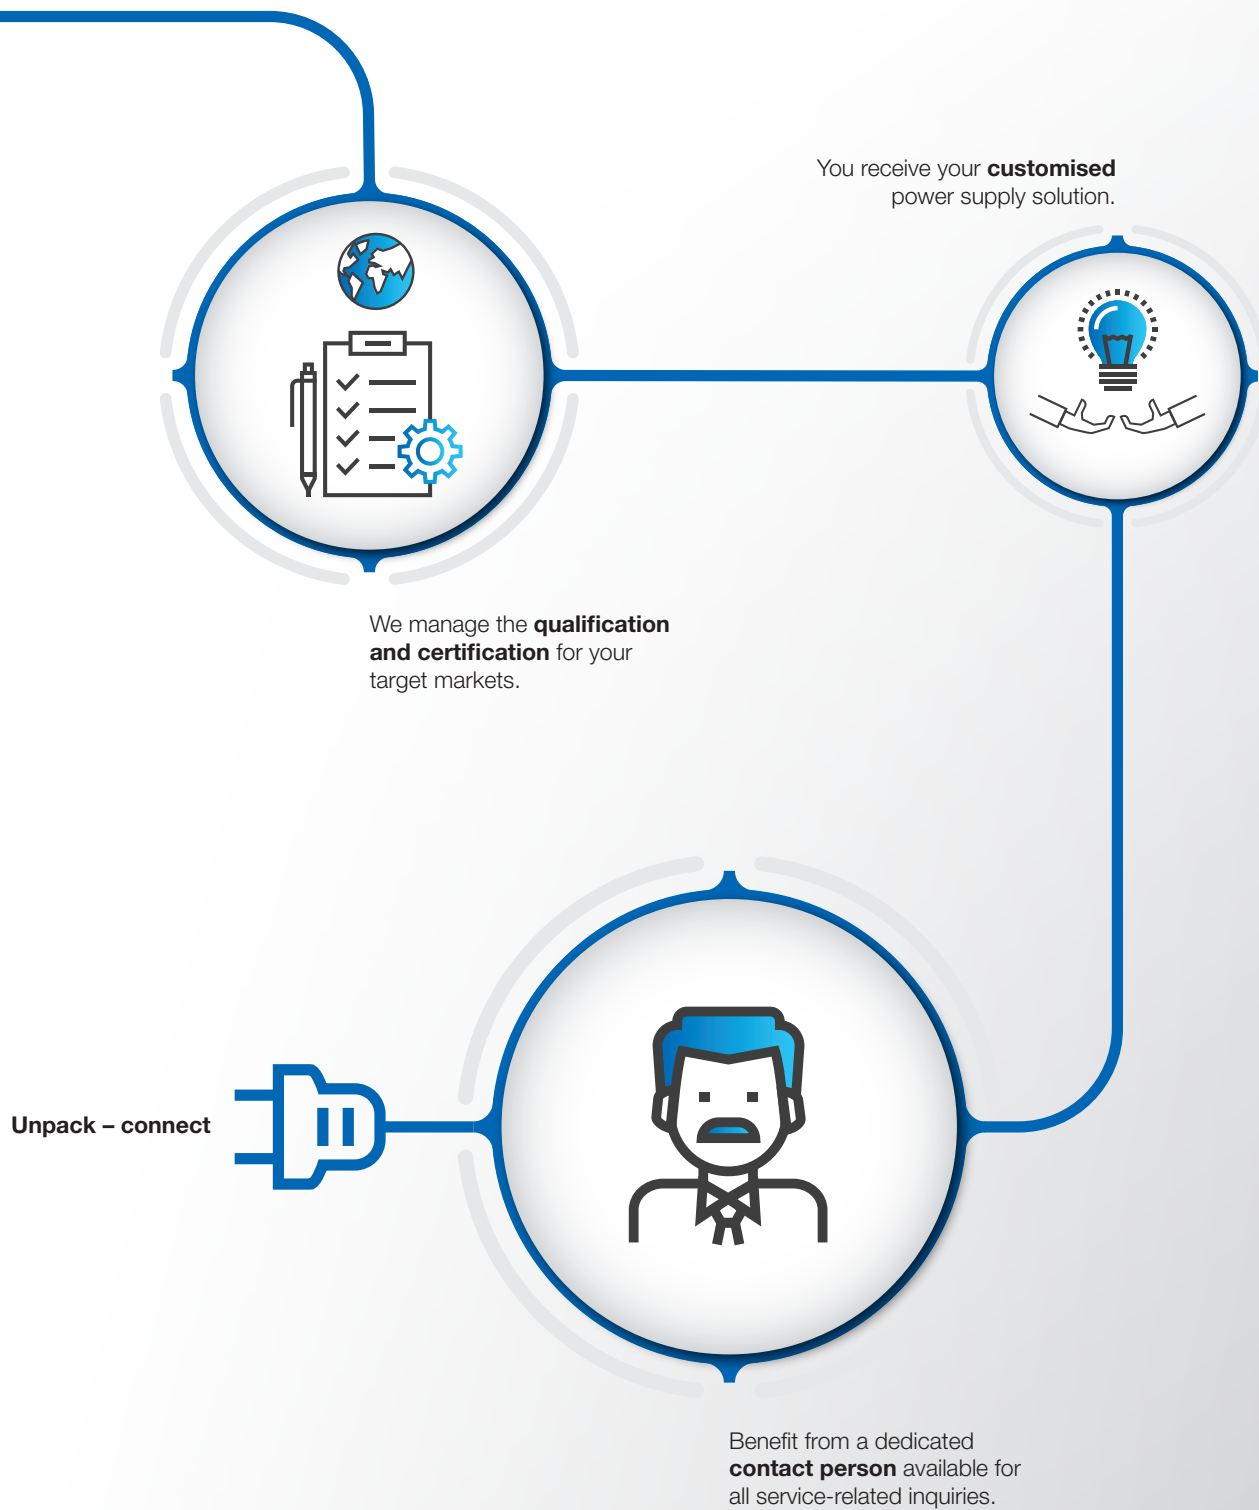

We build a prototype of your **custom power supply**.

We refine the prototype for **volume production**.

Our team of experts will be happy to help you find the best power supply for your application.
