

Policy and Targets for the Integrated Management System

The company's targets are set in accordance with the requirements of the Quality Management System ISO 9001: 2015, Environmental Management System ISO 14001: 2015, Occupational, Health and Safety Management System ISO 45001: 2018.

The company's strategic goals are:

- To be a leading manufacturer in development and manufacturing of programmable power supplies.
- To be a leading manufacturer in providing power solutions to the company's customers by developing power solutions for customers' needs.

Internal and external customers and other interested parties are integral parts of the company's processes and without them the company cannot exist.

The company is committed to meet the customers' expectations in quality, environmental, Occupational health and safety, cost reduction, on-time-delivery and appropriate service, by implementing global and consistent processes, innovation, continuous improvement and zero failure tendency.

The actions taken by the company's management to achieve its targets:

- Continually improve the management systems in order to prevent the design and manufacturing of defective products and to ensure that the company's activities are consistent with its commitment.
- Provide mechanisms, time, training and resources necessary for consultation and participation of employees.
- Ensure that each employee understands the requirements and expectations and authorized to perform his work properly.
- Improve products, company's services and processes to provide product's quality that exceed the customer's and interested parties' requirements through setting and reviewing of realistic and achievable targets and goals.
- Continually strive to prevent accidents, safety events, injury of employees, occupational disease/ill health and reducing environmental impact by enhancing environmental awareness, conforming to legal, regulatory and TDK requirements.
- Strive to reduce and prevent air pollution, water and energy consumption, while using an efficient production methods and advanced systems for monitoring and control and maximize recycling of waste and disposable materials.
- Be frank and open and make this policy available to all employees and to the general public.

Company's management is committed to this policy and will provide the leadership, resources, means and skilled manpower to support it.

 Doron Peled
 Managing Director
