

Programmable Power Supplies

PROGRAMMABLE POWER SUPPLIES

A lot to offer in 2U: Z⁺ Series

high density, highly flexible, many applications

Industrial

Test

Product features

- Same package size (2U format) for all models
- Benchtop and rack mounted (19")
- 16 bit resolution and extremely fast programming response
- Integrated Arbitrary waveform generation with internal storage for up to four individual sequencing curves
- High functionality for a wide variety of test applications
- Extensively equipped (including software package)
- Interface: USB, RS232 & RS485, analog control & monitoring
- Optional: LAN, IEEE, isolated analog interfaces & front panel output sockets

Specifications

- 200, 400, 600, 800 W models in 2U
- Input voltage:
85-265 V AC single phase, 47-63 Hz
- Output voltage 10, 20, 36, 60, 100, 160, 320, 375, 650 V DC
- Up to 89% efficiency
- User programmable signal pins
- 5 years warranty

Typical applications

- Test and measurement
- Part and component testing
- ATE and laser diodes
- Automotive

Product features

- Benchtop and rack mounted (19“)
- Auto-restart/safe-start user-selectable
- Interfaces: RS232 & RS485, analog control & monitoring
- Optional: LAN, IEEE, Power Sink and Fast Speed
- Extension: **I-SINK** function (electronic power sink)

More about our complete range of programmable power supplies at:
www.emea.tdk-lambda.com

Specifications

- 750, 1500, 2400 W models in 1U
- 3300, 5000 W models in 2U
- 10000, 15000 W models in 3U
- Active/passive power factor correction (single-phase & three-phase AC input)
- Output voltage up to 1500V, output current up to 1000 A
- Up to 93% efficiency
- 5 years warranty

Typical applications

- Test and measurement
- Automation
- Part and component testing
- Automotive
- Burn-in

I-SINK – electronic power sink

Flexible, intelligent, reliable

Industrial

Test

I-SINK – 2 Quadrant-Extension to Genesys™-Series

TDK-Lambda's electronic power sink offers a flexible solution for various applications. The modular load concept enables the required power handling to be firmware configured to match the customer's requirement.

- **Modular load concept**

TDK-Lambda's electronic power sink can be fitted with up to 8 load modules. This allows a flexible choice of continuous power rating from 200W to 1.5kW, with a maximum peak power rating of up to 11.2kW for more than one or few seconds (depends on power).

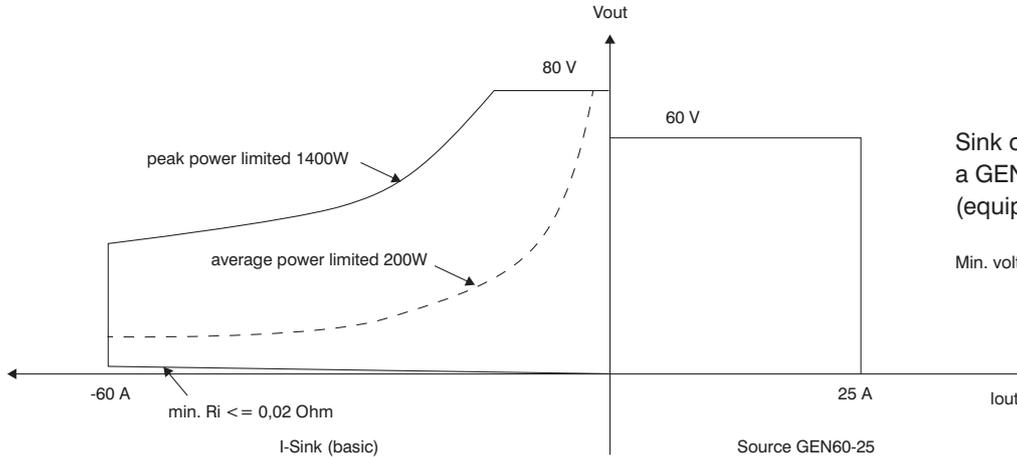

- **Customised solution, rapid delivery**

The I-SINK is optimised to meet specific customer needs. The modular design shortens development time and offers the advantage of utilisation of proven technology for a customised solution.

- **Designed for flexible applications and optimised for TDK-Lambda Genesys™ series**

Application examples

- 2-Quadrant-Extension
 - Battery test (charging and discharging options) and battery simulation
 - High performance load (each with power limit)
 - Constant current
 - Constant voltage (Power-Zener)
 - Constant resistance
-

Sink operating mode diagram with a GEN60-25 power supply unit (equipped with one load module)

Min. voltage at max. current < 0,15V

Model	Performance per power block			
Basic function	2 nd quadrant extension			
Peak power / Continuous operation	1,4kW / 200W			
Max. voltage / max. current	80V / 60A			
Min. voltage at max. current	< 0,15V			
Control interface	analog 0–5V / 0–10V			
Operating temperature	0–30°C (without derating)			

Profile/height	Max. number of models	Continuous operation	Peak power	Interface
2U	4	200W–800W	1.4kW–5.6kW	USB/LAN/RS-232/RS-485/RS-422/CAN**
4U	8	1kw–1,5kW	7kW–11.2kW	USB/LAN/RS-232/RS-485/RS-422/CAN**

** could be combined with an additional interface
